

# CUSTOM ENGINEERED AGITATION SOLUTIONS

INTRODUCTORY BROCHURE

# PRECISION & PERFORMANCE

MIXPRO® uses state-of-the-art technology to create mixing and agitation solutions which deliver reliability, innovation and proven quality.

MIXPRO® was founded in 1996, as Professional Mixing Equipment Inc. Since that time, we've expanded our customer base from local to world wide and have established long-term and mutually-beneficial relationships with our clients. We've built our reputation as leaders in industrial agitation solutions by providing quality products that include durable, long-lasting mixers, agitators, aerators and flocculators for fluid process systems. We also offer a full spectrum of impeller designs for diverse applications.

Our head office and manufacturing facilities located in Brampton, Ontario, Canada, offers full fabrication capabilities and over 10,000 square feet dedicated to the manufacture of agitation equipment. Having complete control of all manufacturing and design procedures allow us to design unique solutions and custom fabricate from any metallurgy without compromising quality or delivery. We also have a full design department and test lab facility on site, making us a true full-service operation.

## The world market is where we compete.

Competing worldwide requires the capability of designing and producing world-class solutions. In fact, being a global player is a key part of the MIXPRO® corporate mission: To develop and produce world-class industrial agitation solutions that always exceed the expectations of our customers, both in terms of mechanical design and long-term performance. For us, doing this consistently has been the key to sustaining long-term relationships with our customers and attracting a steady stream of new customers in today's highly competitive industrial world.

## Design & Lab Innovation

The technology behind the myriad of mixer applications requires intense and individualized design thinking and engineering application. After all, no two solutions are ever quite the same.

The MIXPRO® team of technicians, mechanical and chemical engineers are constantly looking for new ways to solve our customers' mixing problems, apply cutting-edge design technology and engineering.

## Leading Edge Manufacturing

Our manufacturing capabilities include the processes and equipment required for fabrications solution for multiple markets. The MIXPRO® manufacturing facilities are best-in-class offering the most technologically advanced, flexible and responsive manufacturing capabilities available. This allows us to significantly increase productivity and reduce manufacturing costs.

## Customization

Today's process manufacturers have an increasing need for equipment that's customized to their operations. MIXPRO® has an open-minded approach and flexibility which allows mixers to be custom designed and built to suit the individual user's specific requirements.

## INDUSTRIES SERVED

Our customers range from highly-specialized industrial operations and public utilities to major corporations in sectors including;

**Pulp & Paper**

**Chemical**

**Mineral Processing**

**Wastewater / Water Treatment**

**Oil & Gas**

**Flue Gas Desulfurization (FGD)**

## OUR PRODUCTS

MIXPRO® products include durable, long-lasting mixers, agitators, aerators and flocculators for fluid process systems including:

**Portable Mixers**

**Side Entry Mixers**

**Top Entry Mixers**

**In-line Mixers**

**Rebuilds**

### GLOBAL INSTALLATIONS

With installations in a wide variety of applications around the world, MIXPRO® is truly a global company, serving international industries such as pulp and paper, mineral processing, chemical, renewable energy, wastewater and flue gas desulfurization.

MIXPRO® product systems are designed for robust applications with very specific customer requirements in mind, and are designed as a joint effort between MIXPRO® engineers and our customer. Our strategy is to exceed customer expectations with outstanding products and solutions, leverage deep expertise, innovative technologies and provide outstanding customer service.

# PROVEN TECHNOLOGY INNOVATIVE SOLUTIONS

MIXPRO® provides products and solutions that are tailored to the customer's business environment. We design, simulate, analyze, evaluate and validate products and processes to ensure success in each unique application.

Welcome to the world of exceptional customer service, superior products and leading edge technology.

At MixPro®, we custom design and engineer agitation solutions for a range of applications limited only by our customers' requirements and never limited by their location

PULP & PAPER

MINERAL PROCESSING

CHEMICAL

WASTEWATER & WATER TREATMENT

OIL & GAS

### Portable Mixers

Our direct drive (DD) and SM lines of portable mixers combine rugged durability with portable convenience

### Side Entry Mixers

These heavy-duty VST, VSM and ECO mixers are built to perform – and to last

### Top Entry Mixers

Our MIXPRO® top entry mixers are industry leaders in top entry agitation equipment

### Quality Control

Built to handle the toughest environments, MIXPRO® agitators have proven themselves time and again in high production manufacturing environments where quality and performance are paramount. Our quality assurance process tests every mixer to withstand the harshest conditions and perform to specification.

Our engineering team offer industry-specific experience with first-hand understanding of the needs and issues faced by our customers.

We maintain total control of the manufacturing and design procedures, allowing us the full flexibility of custom fabricating our unique solutions from any metallurgy without compromising quality or delivery.

### In-Line Mixers

Our in-line dynamic mixers are designed to deliver maximum process results with minimal space requirements

### Rebuilds

We can rebuild your existing installations, making them better and more reliable

### Custom Designs

Custom designed and engineered agitation solutions for a range of applications
